SHAWTEC

QUARRY AND BESPOKE TILES

THE OBLONG TILE

Is our latest addition to the Shaw Tec tile range. We have been working behind the scenes to bring you our most popular Terra Cotta colour - inspired by the original 'KLOMPIE'.

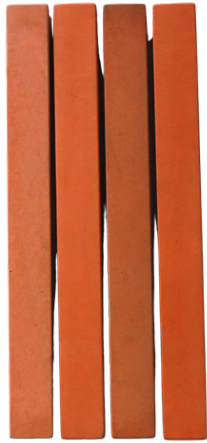

Our Oblong tiles are a cement based product, with the pigment right through the mix, tiles need sealing due to it being a porous material.

We have developed the OBLONG tile to be easily adapted for floor AND walls, stair rises and garden edging that makes all the difference.

It is a handmade product, but the uniformity is very good, therefore laying our tiles is easier than an original clay klompie.

You can get as creative as you like using the OBLONG, from a Herringbone, Mosaic, Stack Bond, Brick Bond pattern - the options are endless.

TERRA COTTA OBLONG
