# INTRODUCING

## THE STANDARD

## SHAWTEC TILE COLLECTION

Shaw Tec was founded in **1960** by Alan Shaw – a very talented potter & artist. He started this business on a small holding in Fisantekraal where we are still operational today.

His son **Andy** took over the business and small holding in the late 70's , his entrepreneurship and drive to build a thriving business was at the forefront and he managed to sustain and create a business that he could hand over to his daughter one day.

Andy passed away suddenly in 2017 - leaving **Olivia** to carry on his legacy and take the business forward.

*Andy's legacy will be ever present in Shaw Tec as Olivia is passionate to continue innovating and creating tiles and products that will keep Shaw Tec relevant and forever in the homes of South African's alike.*
