BREEZE BLOCKS PRODUCT DATA SHEET

PRODUCT SPECIFICATION

Name of design: Maze

Item Code: VH010 -W

Dimensions: 190 x 190 x 65 mm

Weight: 3 kg

Colour: White (primer coated)

Material: Cement-based concrete

Average compressive strength: 3 - 5 MPa

Blocks per m²: 25

Blocks per pallet: 400

Minimum order quantity: 5 blocks

APPLICATION

Suitable for decorative screening, feature walls, privacy screens and ventilation screens in residential, hospitality and commercial projects. Can be used for interior and exterior applications, subject to appropriate structural design, installation and site conditions.

Important: This product data sheet provides general product information. Project-specific structural requirements, support, reinforcement, fixing methods and compliance should be confirmed by the relevant architect, engineer or building professional.

PRODUCT SPECIFICATION

Name of design: Leaf

Item Code: VH007-W

Dimensions: 190 x 190 x 65 mm

Weight: 3 kg

Colour: White (primer coated)

Material: Cement-based concrete

Average compressive strength: 3 - 5 MPa

Blocks per m²: 25

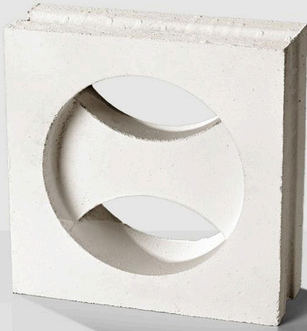

Blocks per pallet: 400

Minimum order quantity: 5 blocks

APPLICATION

Suitable for decorative screening, feature walls, privacy screens and ventilation screens in residential, hospitality and commercial projects. Can be used for interior and exterior applications, subject to appropriate structural design, installation and site conditions.

PRODUCT SPECIFICATION

Name of design: Moon

Item Code: VH017-W

Dimensions: 190 x 190 x 65 mm

Weight: 3 kg

Colour: White (primer coated)

Material: Cement-based concrete

Average compressive strength: 3 - 5 MPa

Blocks per m²: 25

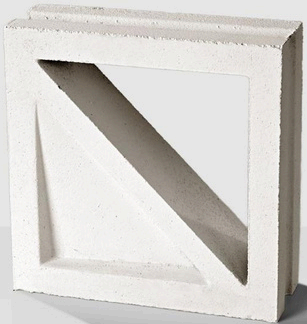

Blocks per pallet: 400

Minimum order quantity: 5 blocks

APPLICATION

Suitable for decorative screening, feature walls, privacy screens and ventilation screens in residential, hospitality and commercial projects. Can be used for interior and exterior applications, subject to appropriate structural design, installation and site conditions.

Important: This product data sheet provides general product information. Project-specific structural requirements, support, reinforcement, fixing methods and compliance should be confirmed by the relevant architect, engineer or building professional.

PRODUCT SPECIFICATION

Name of design: Connect

Item Code: VH018

Dimensions: 190 x 190 x 65 mm

Weight: 3 kg

Colour: White (primer coated)

Material: Cement-based concrete

Average compressive strength: 3 - 5 MPa

Blocks per m²: 25

Blocks per pallet: 400

Minimum order quantity: 5 blocks

APPLICATION

Suitable for decorative screening, feature walls, privacy screens and ventilation screens in residential, hospitality and commercial projects. Can be used for interior and exterior applications, subject to appropriate structural design, installation and site conditions.

Important: This product data sheet provides general product information. Project-specific structural requirements, support, reinforcement, fixing methods and compliance should be confirmed by the relevant architect, engineer or building professional.

PRODUCT SPECIFICATION

Name of design: Double Flow

Item Code: VH036-W

Dimensions: 190 x 190 x 65 mm

Weight: 3 kg

Colour: White (primer coated)

Material: Cement-based concrete

Average compressive strength: 3 - 5 MPa

Blocks per m²: 25

Blocks per pallet: 400

Minimum order quantity: 5 blocks

APPLICATION

Suitable for decorative screening, feature walls, privacy screens and ventilation screens in residential, hospitality and commercial projects. Can be used for interior and exterior applications, subject to appropriate structural design, installation and site conditions.

Important: This product data sheet provides general product information. Project-specific structural requirements, support, reinforcement, fixing methods and compliance should be confirmed by the relevant architect, engineer or building professional.

PRODUCT SPECIFICATION

Name of design: Curved

Item Code: VH019-W

Dimensions: 190 x 190 x 65 mm

Weight: 3 kg

Colour: White (primer coated)

Material: Cement-based concrete

Average compressive strength: 3 - 5 MPa

Blocks per m²: 25

Blocks per pallet: 400

Minimum order quantity: 5 blocks

APPLICATION

Suitable for decorative screening, feature walls, privacy screens and ventilation screens in residential, hospitality and commercial projects. Can be used for interior and exterior applications, subject to appropriate structural design, installation and site conditions.

Important: This product data sheet provides general product information. Project-specific structural requirements, support, reinforcement, fixing methods and compliance should be confirmed by the relevant architect, engineer or building professional.
